We work within the
Education Sector

How is the software currently being used in your organisation?

The Children's Education Centre uses NetSupport School to deliver interactive lessons as well as using features such as monitoring and controlling student screens, showing the teacher's screen to the students and sharing lesson content.

The challenges we were trying to solve:

The Centre wanted a solution that would help with managing the students' use of technology – as well as them being able to learn with it from the interactive lessons delivered by the teachers. With features such as blank/lock screens, co-browse and the ability for the teacher to show their screen to all students, everyone's attention can be focused on the right thing at the right time.

Why did you choose our product?

- | | |
|--|--|
| <input type="checkbox"/> Cost | <input checked="" type="checkbox"/> Features |
| <input checked="" type="checkbox"/> Easy to use | <input type="checkbox"/> Security |
| <input checked="" type="checkbox"/> Platform support | <input type="checkbox"/> Other |
| <input checked="" type="checkbox"/> Recommendation | |

We recommended NetSupport School to the Centre because it is so easy to use. The software is intuitive and many features can be reached and activated with just a click or two, meaning teachers do not specifically have to invest time in learning how to use the technology.

How/where has NetSupport added value?

- Saved money
- Increased productivity
- Saves time
- Flexibility
- Performance
- Easy to use
- Other

We find that NetSupport School is a very good product that delivers a perfect mix of interactive teaching and learning for students, with many supporting features such as chat, messaging and the ability to request help silently.

Would you recommend NetSupport?

- Yes No

“
Very easy installation and excellent functionality
